MS

JUNIOR SOC ANALYST

Giza, Egypt

Mohamed Salah Metwally

SIEM monitoring and incident response, practiced on Wazuh, FortiSIEM and FortiAnalyzer, and on TryHackMe and CyberDefenders labs.

I investigate alerts, correlate events across Windows and Linux logs, and tune detection rules to cut false positives. I care more about understanding how a real attack unfolds than about finishing a lab, and I work well in a team.

1st place

Cybersecurity simulation project at GUPCO

150 h

Cyber Security Diploma, Instant Software Solutions

90%

Final grade, Web Penetration Testing, Orange Digital Center

Projects

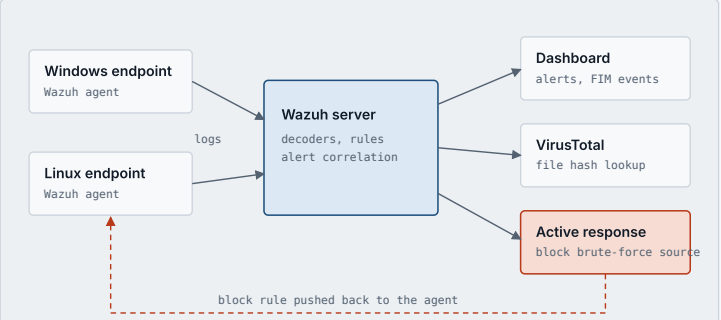

Labs and simulations where I detected, analyzed and responded to attacks.

Incident Response and SIEM Lab with Wazuh

`Wazuh` `VirusTotal` `Windows` `Linux` `Active Response`

A security monitoring lab built to show how a SOC detects and responds to threats in a simulated environment.

- Centralized log analysis across Windows and Linux endpoints.
- File integrity monitoring to catch unexpected changes.
- Malware detection by integrating VirusTotal for threat analysis.
- Ran attack simulations, then detected and mitigated them.
- Automated a response that blocks brute-force attempts and suspicious activity.

LAB ARCHITECTURE

Cybersecurity Simulation at GUPCO

GULF OF SUEZ PETROLEUM COMPANY, 2025

A team project covering attack scenarios, detection and mitigation, done during my IT department training. Our team took first place.

`1st place` `Detection` `Mitigation`

SOC Training Lab: FortiSIEM and FortiAnalyzer

NTI, 2026

Worked through the incident handling lifecycle from detection to remediation.

- Log analysis, event handlers and threat hunting.
- Real-time and historical searches in FortiSIEM.
- Custom rules, reports, dashboards and automated playbooks.

Enterprise Network Labs

NTI AND HUAWEI, 2026

Built and configured network topologies in Huawei eNSP, working through routing and switching, IP addressing, subnetting and troubleshooting.

`eNSP` `TCP/IP` `Routing` `Switching`

Skills

Detection and investigation first, with the networking and Windows knowledge behind it.

SIEM AND LOGS

Splunk · Wazuh · FortiSIEM · FortiAnalyzer · FortiOS

SOC PRACTICE

Alert triage · Event correlation · Threat hunting · Incident response · Detection rules

FRAMEWORKS

MITRE ATT&CK · Cyber Kill Chain · OWASP

TOOLS

Wireshark · Nmap · Burp Suite · Metasploit · VirusTotal · VMware Workstation Pro

NETWORKING

TCP/IP · DNS · DHCP · Routing and switching · Firewalls · IDS/IPS

WINDOWS SECURITY

Active Directory · Domain Controller · NTLM · Kerberos

PROGRAMMING

Python · SQL · C++ · Java

Services

What I can take on for a team or a client.

Security monitoring
Watch SIEM alerts, separate real incidents from noise, and escalate with the evidence a responder needs.

SIEM lab setup
Build a working Wazuh or FortiSIEM environment with agents, dashboards and detection rules for training or testing.

Log analysis and threat hunting
Search Windows, Linux and network logs for suspicious behavior and map findings to MITRE ATT&CK.

Incident investigation reports
Write clear timelines of what happened, which systems were affected and how to contain and fix it.

Activity log

Training, labs and certifications in date order, newest first.

07/2026 - 09/2026	TRAINING	**SOC Training: FortiAnalyzer and FortiSIEM, NTI** Log analysis, threat hunting, custom rules, dashboards, playbooks and the full incident handling lifecycle. Certificate: SOC Analyst, 60 technical hours and 12 freelance hours.
06/2026 - 08/2026	TRAINING	**Data Communication, NTI and Huawei** TCP/IP, routing and switching, subnetting and network topologies in eNSP.
04/2026 - 07/2026	COURSE	**eCIRv2, NetRiders Academy** Incident responder track.
02/2026 - 04/2026	CERT	**eCIR Prep, NetRiders Academy** Correlating logs, filtering noise and following an attacker step by step during an incident.
02/2026	CERT	**Web Penetration Testing Crash Course, Orange Digital Center** 28 hours covering reconnaissance, injection, authentication weaknesses, broken access control and client-side attacks. Grade 90%.
02/2026	LAB	**Cyber Security (SOC) training, Instant Software Solutions** One month, grade A. Built the Wazuh incident response lab.

07/2025 - 08/2025 | 1ST PLACE

IT department training, GUPCO

Network and information security in a real company environment. Won first place with my team in the cybersecurity simulation.

06/2025 - 12/2025 | CERT

Cyber Security Diploma, Instant Software Solutions

150 hours covering SOC operations, alert monitoring and the basics of incident response.

Certifications

Issued by the training providers listed.

SOC Analyst
NTI Cybersecurity Academy, Undergraduate Level, 2026

Cyber Security Diploma, 150 hours
Instant Software Solutions, 11/2025

Cyber Security (SOC), 1 month, grade A
Instant Software Solutions, 02/2026

eCIR Prep
NetRiders Academy, 2026

eCIRv2
NetRiders Academy, 2026

Penetration Testing Web Crash Course, 90%
Orange Digital Center, 02/2026

IT Department Training
Gulf of Suez Petroleum Company, 2025

Education

October 6 University

B.Sc. Computer Science, Department of Information Systems

09/2023 - 09/2027

Languages

Arabic Native

English Intermediate

Practice platforms

TryHackMe and CyberDefenders labs, focused on real attack scenarios and how to detect them.
